EDUCATION

AMRITA VISHWA VIDYAPEETHAM

Oct 2020- April 2024

B. Tech (Computer Science and Engineering)

EXPERIENCE

Centre for Development of Advanced Computing, Chennai

Project Associate (July 2024 - Present) | Tools: React.js, Next.js, Odoo-14, Apache, Burp Suite.

- Developed and deployed secure, responsive front-end interfaces for 2 government portals (mail client and drafting system) using **React.js** and **Next.js**, serving 500+ government users with component-based architecture following modern security best practices, Implemented Unit Testing using Jest to ensure component reliability.
- Led end-to-end production deployment of Supply Order Monitoring Portal (SOMP) for Government of India, achieving 99.9% uptime and obtaining "**Safe to Host**" certification from CERT-In empanelled auditors and security clearance from Cyber Information Research Agency (CIRA), Government of India.
- **Resolved 15+ critical VAPT** (Vulnerability Assessment & Penetration Testing) security findings including XSS (Cross-Site Scripting), CSRF (Cross-Site Request Forgery), and clickjacking vulnerabilities by implementing enterprise security controls (HSTS, CSP, SSL/TLS), reducing security risk score by 85%.

SKILLS

Programming Languages: TypeScript, JavaScript (ES6+), Python, SQL

Frontend Technologies: React.js, Next.js, Redux Toolkit, HTML5, CSS3, Tailwind CSS, Responsive Web Design

Backend & Databases: Node.js, Socket.IO, REST APIs, Odoo 14, Firebase

Security & DevOps: Linux, Apache, SSL/TLS, Burp Suite, VAPT, CI/CD

Tools & Frameworks: Git, Postman, Webpack, VS Code, Chrome DevTools

PROJECTS

Chatflow - Red Team Orchestration Platform | TypeScript, React, Node.js, Socket.IO, Docker | (Nov 2025)

- Built a dual-mode security platform combining a real-time web terminal and visual flow builder for automated vulnerability assessment and penetration testing (VAPT).
- Engineered a low-latency **WebSocket** backend to orchestrate **Nmap**, **Nuclei**, and **Gobuster** scans, parsing raw stdout streams into structured security findings for immediate dashboard visualization.

Video Streaming App | ReactJS, Redux Toolkit, Tailwind CSS, React-router-dom | (Apr 2024 - May 2024)

- Utilizes the YouTube Data API for fetching data, Features a live chat demo using **API polling**, Implemented efficient search autocomplete with **debouncing** and caching for real-time suggestions, enhancing the user experience.

Text Explainer - Chrome Extension | JavaScript (ES6+), HTML5/CSS3, REST API | (Oct 2025 - Nov 2025)

- Built AI-powered text explanation tool with universal website compatibility including **Gmail**, **GitHub**, and embedded iframes, achieving 4.8/5 user rating.
- Engineered content script injection with all-frames support and SPA (Single Page Application) navigation detection using webNavigation API, reducing page load impact by 40%.
- Integrated Google Gemini API with **error handling** and **rate limiting**, processing 1000+ explanations daily with 200ms average response time.
